

Wheelchair Docking Systems

WE'VE GOT THE LOCK ON **WHEELCHAIR DOCKING SAFETY.**

THE BL-7317 WHEELCHAIR DOCKING SYSTEM

The NEW BL-7317 is the culmination of more than two decades of research and experience in producing quality wheelchair docking systems.

The BL-7317 couples the proven reliability of our original system with added functionality and durability.

- **DURABILITY** - The BL-7317's rugged component based design is unsurpassed in strength and holding power. Hardened steel mating surfaces ensure a long service life.
- **FUNCTIONALITY** - Our "state of the art" electronics constantly monitor the wheelchair docking status and our *exclusive ADP* (accidental detachment protection) circuitry ensures an accurate status display.

In addition, the BL-7317 can be equipped with a fully integrated Remote Manual Release in case of vehicle electrical failure

- **NEW LOOK** - The streamlined design coupled with a durable powder coated finish, make the BL-7317 as pleasing to the eye as it is reassuring to your sense of safety and security.

THE "ORIGINAL" BL-6290 DOCKING BASE

For more than 20 years the EZ Lock wheelchair docking system has played an essential part in the evolution of wheelchair accessible driving systems. The "Original" BL-6290 docking base has afforded many thousands of wheelchair users an unprecedented level of mobility.

- **THE ORIGINAL** - The BL-6290 is recognized as the "gold standard" in wheelchair docking solutions. More people rely on the EZ Lock docking system to safely secure their wheelchair, than any other docking system.
- **CRASH TESTED** - All EZ Lock systems are tested to the rigorous standards of SAEJ2249 and ISO10542; not to mention the numerous testimonials from satisfied customers. EZ Lock has a proven positive track record when it comes to protecting our customers.

WE'VE GOT THE LOCK ON SIMPLICITY AND TECHNOLOGY

No other wheelchair docking system is as easy as the EZ LOCK.

With the docking base mounted to the floor of your vehicle, you simply guide your wheelchair in until it locks into place.

Once you have reached your destination the wheelchair is easily released with the press of a button.

The EZ LOCK docking system doesn't require cumbersome tie-down belts, or assistance from others to operate.

The EZ LOCK docking system allows the wheelchair seated driver, or passenger, the independence to LOCK and UNLOCK their own wheelchair.

EZ LOCK gives you an unprecedented level of freedom to make mobility choices that suit your lifestyle the best.

Using the EZ LOCK system couldn't be simpler, yet behind this simplicity lies some fairly sophisticated technology.

Our "rock solid" electronics have a reputation for consistent reliability and incorporate redundant safety circuits to constantly monitor the status of your wheelchair in the docking base.

The user friendly control panel displays the system status, as well as providing lighted "soft-touch" switches for all control functions.

For more than twenty years EZ LOCK has been hailed as the "gold standard" of wheelchair docking systems, and we've maintained that distinction through focus, quality materials, and attention to detail.

When you choose EZ LOCK you get the unparalleled benefit of our experience and expertise.

Wheelchair docking systems are not a sideline business at EZ LOCK; they are our specialty.

Find out for yourself why thousands of wheelchair seated motorists worldwide rely on EZ LOCK to meet their daily mobility needs.

1 DOCK - Guide your wheelchair into the heavy-duty docking base until fully engaged. Drivers also use the front stabilizer.

2 LOCK - Before driving, check the systems status indicator lights to ensure the wheelchair is fully engaged and buckle up.

3 UNLOCK - Once you've reached your destination, exit the wheelchair docking base by pressing the convenient release switch.

WE'VE GOT THE LOCK ON SAFETY AND STABILITY

EZ LOCK's heavy duty construction, coupled with quality materials and careful craftsmanship assure that you will be getting the very best wheelchair docking system available.

At EZ LOCK nothing is left to chance. We refuse to compromise or to cut corners when the safety of our customers is at issue. It is this commitment to excellence that has made EZ LOCK **America's #1 choice for wheelchair docking safety.**

Throughout the years our docking system has been repeatedly tested to rigorous SAE safety standards by independent university laboratories. The EZ LOCK is not only system tested by these universities; we routinely sled test new applications for specific manual and power wheelchairs on our own state of the art test sled.

In addition to the laboratory testing, EZ LOCK maintains an extensive archive of customer testimonials attesting to the "real life" effectiveness of our docking system.
